Re: Hexcel Corporation (Hexcel)
Lodi Borough, Bergen County
ECRA Case # 86009

Dear Ms. Katz:

The purpose of this letter is to confirm our telephone conversation of November 12, 1992 in which the Department granted a 30 day extension for submittal of the site wide soils cleanup proposal as required in Item I of the Department's letter of September 10, 1992. It was agreed that the submittal date for this document would be December 15, 1992.

As we discussed, Killam did not receive the complete laboratory analytical data packages for all the soil samples obtained at the Hexcel site until November 5, 1992. The 30 day extension for submittal of the soil cleanup proposal is necessary in order for us to review and incorporate this data into the remedial proposal. In addition, we recently received and are currently reviewing a preliminary work plan from Hydro Geochem, Inc. of Tuscon, Arizona for soil vapor extraction and air sparging pilot testing at the Hexcel site.

At your earliest convenience, please confirm in writing that an extension has been granted by the Department for the submittal of the soils remedial proposal.

Very truly yours,

KILLAM ASSOCIATES

Gary K. Walker
Senior Project Scientist
